	Response
1	Good overview! It gave me confidence for the course without making it sound falsely easy :)
2	clear and descriptive about course expectations
3	Liked going through the structure and that Tobi spent time talking about his goals and philosophy for how to approach the course. Thanks for giving feedback from past students too. And I liked having the course pace
4	I like how everything is clearly laid out
5	I appreciated all the resources that were given and the transparency of what's expected and what to expect in the class.
6	was fun!
7	I appreciated going through the different tools we'll use for this class, and making clear what is helpful for what. I also appreciated the expectation setting through showing past reviews.
8	I feel a little sad that we are being taught R at stats classes :(
9	I liked all of it - the lecture style, the slides, etc. I can't think of anything that could be improved at this point!
10	Likes: Friendly demeanor. Posted slides beforehand.

What to do next time

- consider adding candidate strategies for approaching the class depending on a) overall coding experience, b) r experience, c) stats experience, etc
